

PAVING JOINTING MORTAR CLASSIC

DESCRIPTION

Paving jointing mortar classic is a ready to use, single component, air curing jointing mortar based on polybutadiene.

AREA OF APPLICATION

- grouting of new and existing natural and concrete stone pavements, such as paths, patios, stairways, terraces etc.
- requirements for the joint:
width: 8 mm and depth: 30 mm

TECHNICAL SPECIFICATIONS

PROPERTIES	RESULT
density at 23°C	approx. 1.8 g/cm ³
compressive strength	approx. 18 N/mm ² *depending on compaction and grading
flexural strength	approx. 5 N/mm ²
elastic moduls	approx. 2000 N/mm ²

PROPERTIES / PERFORMANCE

- vacuum packed
- premixed, ready to use
- slightly flexible
- for high water permeability
- for areas with light mechanical stress
- weed free
- resistant to frost and de-icing salt
- can be used in wet weather
- available in different colors

Construction of grouting of new and existing natural and concrete stone pavements on an **unbonded base layer** (compacted ballast).
